

OCTOBER MARINA STAFF REPORT

The Marina closed for business on October 15, ending the 2009 season. The seasonal staff was finished on that date. Some of them are still available to assist with projects this fall, if they are needed. I have been working on putting everything away for the winter. I also have been working on closing up the Boaters Bath House and Public Restrooms.

The Village Manager and I have met and compiled a Marina Improvement Summary. It lists short and long term possible improvements. We are working to prioritize them and determine the costs associated with some of them.

I have met with two Computer Programmers to get ideas and estimates for updating the Registration and Accounting/Cash Control Systems.

I have also met with two Marine Construction Contractors to get suggestions on repairing the Launch Ramp, and get cost estimates.

Bob Joyce and I have made plans to begin making improvements to the exterior on the Bath House. I have also sought input on changing the interior colors.

Respectfully submitted
Loren Lee
Harbormaster
